

It's now faster to find the connectors you need.

The Quick Search on our website allows you to enter a cable type in the search box to find all COAX connectors suitable for that cable, and the associated product specifications and data.

Step 1

Visit coax-connectors.com

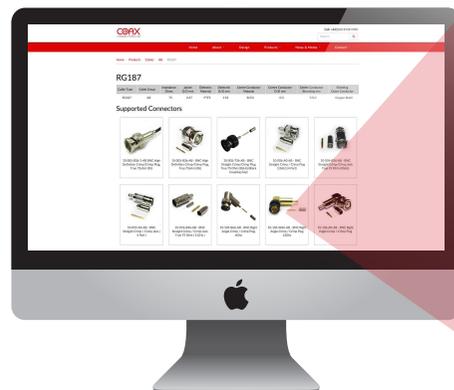

Step 2

Enter your cable type into our search bar (top right hand corner) to display all suitable connectors

Step 3

Select your part for full specifications, data sheets, assembly instructions, accessory information and much more.

Product Update - February 2016 Issue

In this issue

Easy Grip BNC Plug
12G BNC & Micro BNCs
More Connectors for LMR Cable
Website Updates

COAX
CONNECTORS LTD

Welcome

Over the past year we have been busy, developing new products and making your connector selection process easier.

Introducing the NEW Easy Grip BNC plug

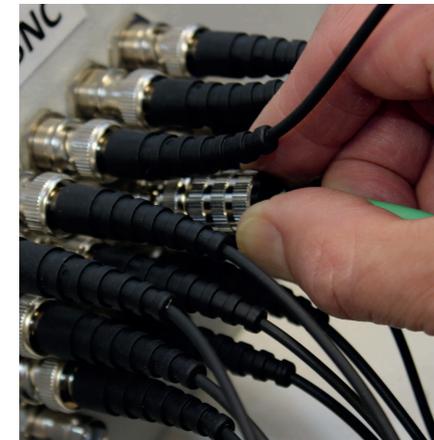

75ohm High Performance (6GHz)

This full crimp BNC cable plug is fitted with an extended rear body to enable it to be used in places where it is impossible for a standard BNC plug to be fitted due to lack of finger space.

The extended body allows the connector to be inserted and locked onto the mating half when access is difficult. The rear part of the body can be held and turned to locate the locking pins on the fixed jack and then turned in order to make good the connection. For additional strength and protection, this connector also features an integral strain relief as part of the rear body assembly.

This connector is made with high performance internal components that provide stable low loss performance to beyond 6GHz.

To find out more about Easy Grip BNCs call our sales team on 020 8538 9090

Delivering 12G in a single punch

High Performance 12GHz BNC and Micro BNC Connectors

The BNC connector is so well established in many industries and functions that it is very difficult to change, even when technically it is no longer ideal for its application.

So when the broadcast industry started developing equipment to transmit HD and UHD TV there was a risk that the BNC standard currently used would not be suitable for the higher data rates. To avoid the high cost of changing connector standards, the answer was to re-develop the existing BNCs to handle higher frequencies and meet the requirements of SMPTE ST 2082-1 for broadcast.

In addition to the standard BNC, high performance versions of our Micro BNC (HD BNC) are also available. Performance data for these products can be viewed at www.coax-connectors.com

Now successfully tested to provide low loss performance up to 12GHz and in some cases 18GHz. The latest series of BNCs from COAX are perfect for new broadcast applications.

More connectors for LMR cables

A selection of new connectors for popular LMR cables have been added to our range.

LMR cables are widely used and recognised in many industries as a benchmark for performance.

At COAX, we have connectors to fit a wide range of LMR cable sizes, from LMR100 to LMR1200, including some 75ohm versions.

To find out which connectors we have to suit any particular cable, just go to our website (www.coax-connectors.com) and enter a cable type in the search box, or search through the 'Cable Information' section under the 'Products' tab on our home page (www.coax-connectors.com/products/cables)

For more information about connectors for LMR cables please call our sales team on 020 8538 9090

Welcome addition to the engineering team

To handle the extra demand from our customers, we are expanding our engineering team, so we can give you a better design and development service with quicker turnaround and more capacity.

Our product range continues to grow

At COAX Connectors we are constantly expanding our product range as markets change and customers demand new solutions.

In the past year we have increased the product range offered on our website by more than 10%, and are continually growing our range.

Website update

Over the past year we have been working hard to make our website easy for you to use. We want to make you more productive and help you specify your connectors more quickly.

We have enhanced our product pages so they now provide all the information you are likely to need, at a glance. At coax-connectors.com, you will find the details of hundreds of connectors that we offer including:

- Data sheets
- Outline drawings
- Various photographic views
- Assembly instructions
- Cable stripping details
- Performance data
- Interface drawings
- Tooling and accessories

More cable Information

The COAX website now features in-depth information and direct links to our connectors that will fit these cables.

Go to the 'Cable Information' tab on the 'Products' menu (coax-connectors.com/products/cables) where you will find a list of all cable types that our connectors support. Simply click on your choice of cable to see all the connectors we offer for that cable.
